

# Instructions

Use the following api to get the data required for this assignment: <https://openweathermap.org/current>.

You need to create an account to get an API key. They have a free tier so no need to buy any premium plan.

## Tasks

1. Create a function that accepts any number of countries and creates a graph showing the current temperature for each provided country.
2. Show in a map the current temperature for the following countries Sweden, Norway, Denmark, Spain, and Panama. The size of the marker is associated to the pressure.
