

Instructions

All the following questions are based on extracting data from the following endpoint: <https://polisen.se/api/events>

To read the full documentation of the api, go to this address: <https://polisen.se/om-polisen/om-webbplatsen/oppna-data/>

Tasks

1. Show in a graph the number of incidents that occurred per location.
2. Show in a graph the number of incidents that occurred per day.
3. Show in a graph the number of incidents that occurred per hour in the last 24 hours.
4. Show in a graph the number of incidents that occurred per event type (Händelsetyp).
5. Show in a map the location where incidents have occurred. The size of the marker must be based on the number of incidents at such a location
